PROFESSIONAL SUMMARY

Senior frontend engineer with 12+ years of professional experience, including 8+ years at Whitespectre — a product-focused software consultancy serving US and European clients. Specialized in building React, React Native, and Next.js applications with a strong focus on TypeScript, performance, and product quality. Also comfortable working across the stack with Node.js, having built and maintained backend services, APIs, and integrations when projects called for it. Experienced in agile delivery, code review, mentoring junior developers, and direct client communication. Now seeking a frontend-focused role where I can bring that breadth to a single long-term team.

EXPERIENCE

Senior Software Engineer · Whitespectre

2017 – 2026

Frontend engineer on multiple client product teams, shipping React, React Native, and Next.js features across web and mobile — also contributing to Node.js backend services and APIs when projects required it. Clients across the US and Europe.

Yangra — React Native · Next.js · Node.js · OpenAI

Hindu spiritual content platform with audio playback, calendar sync for festival dates, AI-powered content vectorization, and multi-platform delivery.

WhatLingo — React Native · Go · Cloudflare Workers · SQLite

iOS app for real-time WhatsApp message translation, with a custom Go library for low-level WhatsApp protocol access and an edge API for AI translation.

Scribl — Node.js · Fastify · React · TypeScript

Real-time multiplayer drawing and word-guessing game platform with backend API and frontend client.

Ruggable — React · TypeScript · Ruby on Rails

Internal inventory counting and management tool for a large e-commerce rug brand, built across 35+ agile sprint cycles.

Proper Food — React · Ruby on Rails

Restaurant tech platform for managing online ordering, delivery zones, and store location pages.

Whitespectre Site v2 — Next.js · Builder.io · TypeScript

Company marketing site rebuilt with a headless CMS approach, with a focus on SEO and performance.

Internal Engineering Community

Mentored junior developers, participated in cross-project knowledge sharing sessions, and presented at internal engineering events.

Senior Web UI Developer · [Globant](#)

2014 – 2017

National Geographic — Yourshot — *React · Redux · AngularJS · Backbone*

Community photo platform for National Geographic's user-generated photography program.

Pearson Education — *AngularJS · Bootstrap*

Multiple web products for global English learners across Pearson's digital catalog.

Trulia — *PHP5 · CSS · HTML5*

Property listing pages and backend integrations for the Trulia Acquisitions team.

Full-Stack Developer · [CAPSoft](#)

2012 – 2014

Government & Local Business Web Apps — *Laravel · MySQL · Bootstrap · jQuery · Google Maps API*

Built and maintained multiple web apps including a tourism government site, a course booking platform, and a rugby league site.

PERSONAL PROJECTS

Carrera TT — Race Management System — *React · TypeScript · Tailwind CSS*

Race management platform for trail running events, including registration, real-time bib lookup, and a race-timing PWA. Used in production in Tucumán, Argentina.

FotoBib — *AWS Lambda · AWS Rekognition · Node.js*

Serverless photo-tagging service that identifies athletes in race photos by their bib numbers using machine learning and OCR.

GPX Merger — *Vue.js · JavaScript*

Browser-based tool to merge multiple GPX track files into a single route, useful for trail running and cycling GPS recordings.

TECHNICAL SKILLS

Frontend (core)	React, React Native, Next.js, TypeScript, JavaScript, Expo, Vue.js, Tailwind CSS, SCSS, Lexical
Backend (working)	Node.js, Fastify, Hono, Cloudflare Workers, REST APIs, GraphQL, Go (Whatsmeow), Ruby on Rails
AI / LLM	OpenAI, Mistral, Google Gemini, OpenRouter, prompt engineering, LLM routing strategies
Data	PostgreSQL, MySQL, SQLite, Redis, Sequelize ORM, ActiveRecord
Cloud	AWS (Lambda, Rekognition, S3), Cloudflare Workers, Heroku, Vercel
Tooling	Git, GitHub Actions, Vite, Webpack, Builder.io CMS, Jira, Sentry, Rollbar, PostHog, AppsFlyer, Intercom, Figma
Practices	Agile/Scrum, code review, TDD, feature flags, A/B testing, error monitoring, mobile performance optimization

EDUCATION

Systems Analyst · [Universidad Tecnológica Nacional \(UTN\)](#)

Tucumán, Argentina
